Game Fundamentals Expert

ESCUELA OFICIAL

FutbolLab

Game Fundamentals Expert

With this course as a **Game Fundamentals Expert** you will learn to master perfectly all the individual offensive and defensive behaviors that players must perform according to their demarcation in the field, helping the soccer coach so that the player knows all the casuistry that can occur in all positions.

The course has a unique feature in its field: the focus on competition. The players are not independent pieces, but a team that joins forces. Only by knowing in depth the behaviors of all the members of the soccer team in each game situation can the competition be controlled.

The behaviors are specific to each of the lines of play and respect the performance of the rest of the team's lines. They are proposed through a general perspective, easily adapting to any system / model of play.

Game Fundamentals Expert is an incredible training guide and helps you show players how to solve any scenario in the game while respecting the rest of the team.

With this course soccer coaches will achieve the maximum efficiency in the performance of their players, getting their team to have more knowledge and attributes in the game, and to be able to decide more effectively.

Discover what actions must be performed in each demarcation and how to relate the behaviors based on their line, the rest of the lines, the system and the game model.

Improve your training as a trainer!

ESCUELA OFICIAL

FutbolLab

It is aimed at:

- Technicians who have experience in soccer.

- Coaches who are qualified.

- Graduates or Licensed in the Sciences of Physical Activity and Sport.

Each one of the program's lines of action is aimed at attracting and developing talent and aptitude within soccer.

ESCUELA OFICIAL

FutbolLab

OBJECTIVES

- We will learn to create more effective training tasks, use of sports material with quality, use of space and the ability to develop in the methodological field.
- Train us to understand a strong base of fundamentals that we will put into practice for the improvement of both players and technical staff for the tactical and strategic improvement of the team.
- The coordination of training and breaks will be important for the technical and tactical evolution of our players. So we must teach and train them for themselves and to perform when we need them most: in COMPETITION.

Virtual Classroom: The courses are given entirely online. They are carried out through our virtual campus which can be accessed from the home page of our website, www.futbolab.com, by clicking on the button [Access to the Virtual Classroom](#). From there you will be able to access syllabuses, explanatory presentations, demonstration videos, teacher analysis, and assignments sent and corrected by the teachers.

Tutors: The teachers offer continuous tutoring, establishing telephone and/or video conference tutorials explaining the doubts you may have. They guide your learning evolution throughout the course, depending on your profile and level of dedication or study schedule. As we have indicated, the syllabus, videos, articles, interviews with experts... are part of your evolution in the course, so you will carry out periodic exercises that the teacher corrects to give you the clearest idea of the subject you are working on.

Evaluation: At the end of the course you will carry out a final project that will include all the studied areas and that will always imply the development of a real case, since from FutbolLab we want that our courses at any moment go directed to the real situation of training that the technicians are in their teams.

Registration process: To register you only have to click on the tab of Register, from there you will be asked to introduce your personal data necessary for the academic record and in the final part of the process you will be able to choose the payment format of this program.

Remember that in this course you can go at your own pace and do it according to your availability, as long as you do not exceed the maximum time to do it, which in the case of the master's degrees is 2 years and a half, 18 months for Expert or Technical courses and 7 months for courses that are not in these categories.
